

```
1  #include <stdio.h>
2  int main()
3  {
4      int number;
5      printf("enter the number=");
6      scanf("%d", &number);
7      if(number > 0){
8          printf("%d is a positive integer ", number);
9      }
10     else if (number < 0){
11         printf("%d is a negative integer ", number);
12     }
13     else{
14         printf("%d is zero", number);
15     }
16     return 0;
17 }
```
